---

## Summary

**Results-driven Full Stack Software Engineer** with 2+ years of experience delivering scalable, high-performance web and mobile applications. Successfully led projects that improved system performance by over 40%, reduced development time by half, and enhanced user satisfaction significantly within 6 months. Adept at translating complex business requirements into robust, efficient technical solutions. Passionate about **clean code**, **mentorship**, and **continuous learning** in modern web technologies.

## Experience

### Junior Software Engineer

- Internship at DeoLang for 7 months as a web developer.
- Freelancing Projects from 2024 to present.

## Skills

- **Language :** C++ , JavaScript , TypeScript
- **Frontend :** HTML, CSS, tailwind CSS, bootstrap, ReactJs , React Native
- **Backend:** NodeJs, PHP , ExpressJs
- **Database :** MongoDB , MySQL
- **Cloud :** AWS(Amazon Web Services)

## Education

### Bachelor of Computer Application

Dibrugarh University.  
Aug 2023 – Aug 2026

## Achievement

I secured **1st place at a state-level hackathon organized by Dhemaji Engineering College**, where our team developed a **Smart Digital Solution for Anganwadi Centre Management**. The application was built using **React Native (frontend)**, **FastAPI (backend)**, **OpenCV** for facial recognition, and **PostgreSQL** as the database. Key features included **facial recognition-based attendance**, **ration optimization**, **supervisor reporting**, and **offline functionality with real-time sync**. The solution was praised for its real-world impact, scalability, and technical robustness, outperforming 90+ participating teams.

## Projects

- A Full stack Web Application for a coaching center in MERN.
- A Full Stack Women Safety App frontend in React Native and backend NodeJs ExpressJs.
